

Finding Ways to Help Customers Improve Their Business Through Better Information

BI and Information Management

Kalido Solutions

Axis Group is the most experienced and largest Kalido Partner in North America. At Axis Group our mission is to leverage our strategic IT business consulting expertise with best-of-breed tools. As a long time Kalido Partner our world-class experienced and certified consultants are experts in all areas of Kalido solutions. Using Kalido with best practices and a full lifecycle approach we can improve your company's performance through better information management.

Kalido develops software products for master data management, data warehouse and business intelligence, all designed to improve the performance of your business.

Kalido's **Data Warehousing solution (DIW)** stores data independently of the business model that governs it. With robust tools and wizards to maintain an accurate, consistent and timely environment, Kalido DIW eliminates or automates many of the manual steps needed in traditional methods. In addition, DIW time stamps every piece of data, so you'll never have to worry about version control or data lineage again.

Kalido also delivers a robust **Information Management solution** that can dramatically improve the quality of the data delivered to your Business Intelligence platform. The combination of easy-to-use design tools, dynamic warehouse capabilities, data governance and fully automated integration technology gives you the flexibility required to serve even the most demanding business or business user.

Kalido's **Master Data Management solution (MDM)** delivers a fully automated, business model driven method that not only supports rich data definitions, it is the only master data management solution on the market that provides configurable workflows to automatically route invalid data to the stewards in the business so it can be corrected or discarded. Kalido MDM can eliminate the frustration and confusion over mis-classified products, orphaned customers and error-prone data entry. With Kalido MDM, end-users and decision makers can begin to trust their data and finally unlock the real value of the "true intelligence" within their systems.

Let Axis Group and Kalido help you achieve long term Business Intelligence
