

QlikTech - A New Kind of Software Company

QlikTech's flagship Qlikview business intelligence solution is changing the world for more than 15,000 customers and more than 570,000 users in more than 100 countries. With its powerful, easy-to-use in-memory associative search technology and uncommonly fast deployment, it is no wonder that more and more companies every day are turning to QlikView to help them make smarter and faster business decisions.

QlikTech develops revolutionary business analysis solutions for a changing workplace. They have pioneered a powerful, easy-to-use business intelligence solution that enables their customers to make better and faster business decisions. Their software platform, QlikView, combines enterprise-class analytics and search functionality with the simplicity and ease-of-use found in office productivity software tools for a broad set of business users.

QlikView empowers business users to navigate data in a manner consistent with the fluid, associative nature of human thought. QlikView is powered by in-memory associative search technology which has utilized rapid advances in computing power to yield significant improvement in flexibility and performance at a lower cost than traditional business intelligence solutions. This technology platform enables users to consolidate large, disparate data sets and discover relationships within data in real time when requested by the user. QlikView also visualizes this data in a simple, intuitive user interface that enables users to interactively explore and analyze information.

Unlike traditional business intelligence products, QlikView can deliver value in days or weeks rather than months, years, or not at all. It can be deployed on premise, in the cloud, or on a laptop or mobile device—from a single user to large global enterprises.

Axis Group is one of the most experienced QlikView partners in North America with world-class QlikView certified consultants. Axis Group can help you leverage QlikView to get the most out of your data and information with easy to use, fast dashboard solutions.
