

Big Data Health Check

Take your Data Lake from Swamp to Stream

Big Data, Bigger Questions.

Is your Hadoop Ecosystem functioning at its peak? Axis' Big Data Health Check will help you **improve the ROI of your current environment** by laying out a roadmap that optimizes the growth, scale, timeliness, and security of your data.

Answers Are Just One Week Away.

Our process (typically a one-week timeline) is built for *efficient and effective* review:

Day 1

1

Discuss business direction and future resource requirements

2

Interview IT & key business people to see how Hadoop is utilized

Days 2-4

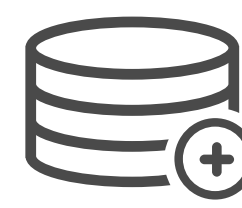

3

Review current configuration of Hadoop

Day 5

4

Present additional or alternative Hadoop components that could improve environment

What do we need from you?

The Health Check is limited to **one environment**, and our recommendations will focus on **1-2 specific challenges**. To get started, we'll require:

- > Commitment from and access to the project owner, system administrators, and development team
- > Identified interviewees
- > Access to the overall network diagram
- > Environment configurations
- > Components currently in the ecosystem
- > Price: \$20,000

Axis professionals are trained and experienced in recognizing both strategic and tactical opportunities for **leveraging data to improve business value**. We've been a leader in the analytics industry for over 20 years and have partnered with hundreds of companies who are seeking to improve their ability to **compete with analytics**.
